

## Operating mode:

By rotating the semi-cylindrical bolt by 180° the upper assembly (1) and the lower assembly (2) are braced in a form-closed manner

## Advantages:

Cost-effective alternative to the MGW

Without hand lever, thereby low interference contours

High repeat accuracy +/- 0,02 mm

Optional connection of a power coupling MEK for electrical and pneumatical ducts

Holds up to 10,000 changing cycles

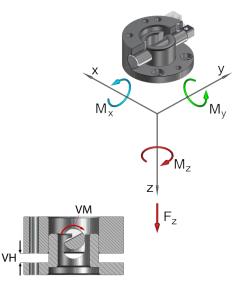

During locking, the lower assembly is pulled around the

locking stroke

Interface according to DIN EN ISO 9409-1
