

## UNIVERSAL ROBOTS AND GRIPKIT THE STRONG TEAM

GRIPKIT EASY is the clever cobot gripping solution for all-round use that significantly simplifies entry into collaborative handling technology.

With the FLEXGRIP PLUGIN, you benefit from a continuous data connection between the servo gripper and cobot. This gives you permanent control over the status and gripping parameters directly from your robot program.

Develop smart processes for your production by evaluating current process data such as finger position and gripping status directly in the robot program and using this to plan the next movement of your cobot.

GRIPPING FORCE

30 - 200 N

STROKE

30 mm

LOAD CAPACITY UP TO

5 kg

**SIMPLY AUTOMATE WITH GRIPKIT EASY**

**READY FOR IMMEDIATE USE**

From unpacking to running application in 20 minutes! The GRIPKIT EASY offers full Weiss Robotics quality at an unbeatable price. With integrated workpiece recognition and adjustable gripping force of up to 200 N even the most demanding handling tasks become EASY.

**YOUR ADVANTAGES:**

- Robust servo gripper for uncompromising performance with a wide range of applications
- Direct connection to the TOOL I/O port of the robot reduces interference contour and ensures reliable operation
- Simple programming and commissioning thanks to certified plug-in
- Precise force control with workpiece detection
- Safely limited gripping force
- Query of finger position and gripper status
- Support for multiple grippers

GRIPPING MODULE
